Subject: Extraction

Amended:

Morning Ferit

As discussed and in relation to the extraction associated with the range at Leigh On Sea:

Combination of ducting throughout which supported the constraints in relation to the route. 315mm spiral, 400mm spiral, and a section of 600x220mm (square). The fan installed is a CNA400.

*have attached spec sheets for the fan and the spiral ducting for reference:

The above was agreed to ensure that the extraction at the range was sufficient to pull 1.4m³.

Can also confirm that we retrofitted 2 x attenuators (silencers) within the duct route to reduce noise levels.

*have attached spec sheets for reference:

Kind Regards
Stuart Blessett
